Introduction

The State JCI Senate organizations are the most important part of our organization and the State Presidents are the heartbeat. The following information contains suggestions and/or recommendations for having a successful year as State President. Pull what you will from these and tailor them to make your experience as State President the best it can be. The information gathered below is just a starting point. You will find a plethora of information on the website and among your fellow Presidents. Building relationships by attending local, regional and national meetings will add more to your experience than I can list on this sheet of paper. If you need clarification on a certain program, feel free to reach out to that person directly or reach out to me and I will arrange for them to speak to the group.

Prepare a Plan of Action

Preparing a Plan of Action for your year can be a valuable tool and may give you a chance to re-live your Jaycee days. Your Plan of Action helps you track your goals for the year. If you are looking for an example of a Plan of Action, I will be happy to share the one I used as SP to help you get started. Your Plan of Action is a living document that you should re-visit and evaluate on a quarterly basis.
